## Summary

I'm a web developer with more than 2 years of experience. I've participated in the full cycle of the development of web applications, working with different teams, designing user interfaces, testing applications with Jasmine and Cypress, and making good practices thinking about the performance of the system.

## Skills

Frontend: Angular+2, RxJs, Javascript, Typescript, SCSS, Figma.

Backend: Node js, Express, MongoDB, Linux.

## Experience

### **Métrica Móvil - Frontend Developer ( August 2020 - Present )**

- Development and maintenance of different systems using Angular+2 and Node js.
- Frontend update and UI redesign of applications with Angular+2, SCSS and Typescript.
- Deployment of web applications and APIs on servers.

## Projects

### **Fall-Memoram**

Memorama game with videogame Fall Gays thematic. You can play in solo mode competing with yourself to get the best score. Show who is the best in Fall Memoram.

- Technologies: Angular, Node js, MongoDB.
- Languages: HTML, SCSS, Typescript.

### **Dataworld**

Web application that uses external APIs to get information and show to the user about the weather predictions, covid status, relevant news. The data presented depends on the user's location so that the user will be informed of his environment before going out.

- Technologies: Angular, Node Js, Express, MongoDB.
- Languages: HTML, CSS, Typescript, Javascript.
- External services: Open Weather, Nubentus, Mediastack.

## Education

**Instituto Tecnológico de la Laguna - Computer Systems Engineering**

## Languages

- Spanish: Native
- English: B2
